

If You Are Suffering With a Herniated Disc, Sciatica, or Low Back Pain... There May Be a Non-Surgical Solution!!!!

Low back pain can be a crippling experience. You might not be able to play golf, work, or even sit in the car for a 30-minute drive.

And you may not be able to remember the last time you even had a restful night's sleep.

Life cannot be enjoyed to its fullest if you are suffering with low back pain or sciatica ...that just will not go away!

Do You Have any of the Following Conditions?

- Sciatica
- Lower Back Pain
- Spinal Stenosis
- Degenerative disc disease
- Herniated or Bulging Discs
- Facet Syndrome
- Failed Back Surgery

Fortunately, if you are suffering from any of these problems, your pain may be relieved or eliminated by non-surgical spinal decompression therapy.

SPINAL DECOMPRESSION THERAPY
Herniated Disc?

EFFECTIVE FOR

- ☑ Ruptured Discs
- ☑ Spinal Stenosis
- ☑ Sciatica
- ☑ Facet Syndrome
- ☑ Failed Surgery

ADVANTAGES

- ☑ Extremely Safe
- ☑ Likely Effective
- ☑ FDA Cleared
- ☑ Non-Surgical
- ☑ Affordable Cost

Avoid Surgery with Safe & Effective Spinal Decompression Therapy

Far too many medical doctors believe your options are limited to bed rest, pain pills, exercises, steroid injections, and surgery.

They are wrong!

That's because there may be a non-surgical solution to your sciatica and low back pain!

If you've heard about spinal decompression therapy, or always wanted to check it out and see how it might help your condition, now is the best time.

Spinal decompression therapy can create a decreased pressure within the disc that can allow the disc material to be pulled back into its normal position...and bring a fresh blood supply to promote healing.

What this means for you is that in just a matter of days or weeks, you could be back on the golf course, enjoying your love life, or traveling again.

What does this special limited time offer include? Everything I normally do in my new patient evaluation. You'll get:

- An in-depth consultation where I will listen...really listen...to the details of your case.
- A complete neuromuscular examination
- X-rays (if indicated)
- Review of your MRI, and
- A report of findings that includes a treatment plan that will hopefully make you pain-free.

You'll get to see everything first hand and find out if this treatment might be your disc/sciatica solution, like it has been for so many other patients.

And the best part of this treatment is....
No Dangerous Drugs and No Surgical Procedures!

Spinal decompression treatments are very gentle and are almost always painless. In fact, every once in a while, I notice a patient sleeping during a treatment session.

Call today and tell our receptionist that you would like to come in for the Special

Spinal Decompression Evaluation.

We can get started with your consultation, examination and X-rays (again, if indicated) as soon as there's an opening in the schedule.

Our office is called Mena Spine & Rehab and we are located at 701 S. Morrow Mena, AR 71953

I look forward to helping you so you can hopefully live a pain-free life.

Sincerely,
Dr. Kervin Putman, D.C.

P.S. One of the biggest myths about pain is that it will go away by itself, without any treatment.

A study in the *British Medical Journal* found that myth to be untrue, showing that 75% of back pain sufferers -- who do not seek treatment -- will have either pain or disability 12 months later.

Bottom line...if your pain has not gone away by now, it's not likely to go away on its own. Life is too short to live in pain!
